Julia Nonnenkamp

Computer Science Ph.D. Student at UW–Madison interested in online account security and support systems for survivors of technology-facilitated abuse.

Education

2024– **Ph.D., Computer Science**, security & privacy focus
University of Wisconsin–Madison, Madison, WI
Advisor: Dr. Rahul Chatterjee

2020–2024 **B.A., Computer Science & Math**
Georgetown University, Washington, DC
Research mentors: Dr. Elissa Redmiles, Dr. Lisa Singh

Publications

2026

3. Shirley Zhang, Guruprasad Viswanathan Ramesh, **Julia Nonnenkamp**, Rahul Chatterjee, Kassem Fawaz. Clinicas: Agentic Diagnosis and Mitigation of Technology-Facilitated Abuse. *NeurIPS Workshop on Human-AI Coevolution (HAIC)*, 2026. PDF
2. Hailey L. Johnson, **Julia Nonnenkamp**, Bilge Mutlu, Rahul Chatterjee. "I'm trying not to get hacked:" How Adults with Intellectual and Developmental Disabilities Navigate Security and Privacy Notifications. *ACM Computers and Accessibility (ASSETS)*, 2026. PDF

2025

1. **Julia Nonnenkamp**, Naman Gupta, Abhimanyu Dev Gupta, Rahul Chatterjee. Hidden in Plain Bytes: Investigating Interpersonal Account Compromise with Data Exports. *ACM Computer and Communications Security (CCS)*, 2025. PDF

Research experience

2024–present **University of Wisconsin–Madison**, Graduate Researcher
Advisor: Dr. Rahul Chatterjee
Research Assistant (Spring 2024 onward), Independent Study (Fall 2024)

- Demonstrated how GDPR/CCPA data exports can be used to find indicators of account compromise *(CCS '25; GitHub)*; built an in-browser visualization tool for data exports and evaluated it via user study with 11 tech clinic consultants *(under submission; GitHub)*.
- Evaluated how 7 adults with intellectual and developmental disabilities (IDD) navigate security and privacy notifications, built software for the experimental setup and qualitatively coded data *(ASSETS '26; GitHub)*.
- Helped generate case data and decision criteria to develop a mobile GUI agent that aims to helps survivors of technology-facilitated abuse identify and fix security weaknesses *(NeurIPS HAIC '26; under submission)*.

2024 **Two Six Laboratories**, High Assurance Research Intern

- Applied hybrid program analysis techniques to identify anomalous behavior in mobile messaging applications using Frida, Haskell, and SMT solvers.

2023–2024 **Georgetown University**, Undergraduate Researcher & Fritz Fellow
Institutions: Massive Data Institute & Center on Privacy and Technology (Georgetown Law)
Advisors: Dr. Elissa Redmiles, Dr. Lisa Singh

- Examined law enforcement materials about software systems used in forensic DNA analysis and generated synthetic data to audit their security & safety risks.

Additional work experience

2023–2024 **U.S. Office of Management & Budget**, Budget Analysis Intern

- Evaluated experimental applicability of transformer architectures for time-series forecasting of budget data. Refactored internal yield curve models from C++ to Python. Produced interactive visualizations for historical Presidential budget data in D3.js.

2022–2024 **Students of Georgetown, Inc. (The Corp)**

- *Director of Data Analytics (2023–24)*: Built databases and ETL pipelines for point-of-sale data (PostgreSQL, Mage.ai). Produced data communications and visualizations for store leads.
- *Director of Operations, People Operations (2022–23)*: Ran payroll for 300+ employees, led Federal Work-Study partnership, managed company-wide onboarding.

Honors and awards

2026 GREPSEC Student Travel Grant, USENIX Security Symposium

2026 Finalist, Aspen Institute Science and Technology Policy Fellowship

2025 Student Conference Travel Grant, ACM CCS

2023–2024 Fritz Family Fellowship, Georgetown University
Interdisciplinary research fellowship through GU's Tech & Society Initiative.

Talks & posters

2026 Poster: Hidden in Plain Bytes: Investigating Interpersonal Account Compromise with Data Exports.
GREPSEC doctoral consortium at the USENIX Security Symposium

Flash Talk: The Madison Tech Clinic
Tech for Good Conference at the University of Chicago

2025 Talk: Investigating Interpersonal Account Compromise with Data Exports
ACM Computer and Communications Security (CCS) Conference

2024 Talk: The Technology behind Forensic Analysis
Fritz Family Fellows Conference

Poster: Auditing Probabilistic Genotyping Software used in Forensic DNA Analysis
Massive Data Institute Research Showcase

2023 Poster: Risk Mapping in Forensic DNA Analysis
Massive Data Institute Research Showcase

Teaching

2024 **CS 220: Data Science Programming**, Teaching Assistant at UW–Madison

2022 **COSC 160: Data Structures (C++)**, Student academic assistant at Georgetown University

2021–2022 **Private Tutor, Calculus (I–III)**

2020–2021 **Mathnasium Instructor**

Service & outreach

2024–present **Madison Tech Clinic**, Director (present), Volunteer Coordinator (2025-2026)
- MTC is a volunteer partnership between UW–Madison and local intimate partner violence (IPV) advocacy groups and shelters in Dane County, WI. Through one-on-one consultations, we provide trauma-informed cybersecurity assistance to IPV survivors, helping them identify points of compromise and strengthen their security practices. https://techclinic.cs.wisc.edu/

2026 **PETS**, Artifact Evaluation Reviewer

2026 **NeurIPS Workshop on Human-AI Coevolution (HAIC)**, Reviewer

2025–2026 **Mad S&P Seminar**, Co-leader
- Student-led, weekly reading group and speaker series for UW–Madison's security and privacy labs.

Technical skills

Reverse Engineering & Verification: Frida, Haskell, SMT solvers, Rocq/Coq (novice).

Data Engineering & Analysis: Python (pandas/numpy, PyTorch), SQL, Mage.ai, Google Timesketch, OpenSearch (novice).

General: C++, Java, Flask, JavaScript (D3.js, Vue.js).
